Volusia County Schools has migrated to a new student information system. With the transition to our new system we want to ensure the most accurate and up-to-date demographic, emergency and health information for each student.

Included with this letter is the Emergency Information Card for your student. Please review the information carefully. Using a pen, cross through inaccurate (or duplicate) information and write in the correct information.

Contact information on this form will be used by the school to communicate with the legal guardian(s) of the student via Volusia Connect, our school messaging system, and/or school personnel. Guardians can make communication preferences (text, email or voice) for school communication by type (general, attendance and emergency) by downloading the SchoolMessenger app using the included QR label or by going to: https://go.schoolmessenger.com/. Sign-up requires your email address be on file with your student's school - and you may update the email address using the included Emergency Information Card.

Please return the updated Emergency Information Card to your school by August 23, 2019. For questions concerning the information included on the card, please communicate with your student's school.
